

Màquia Serveis Ambientals, pioneer in the design, testing and manufacture of flexible devices specially adapted for tagging of wildlife within the different works of research, study and preservation of wildlife.

Our product line includes equipment and accessories for the correct management and also the most appropriate recollection systems for each species.

Adapted Systems for the Tagging of Wildlife

In the studies and conservation of the biology of the different species of cetaceans and marine fish, scientists often have to identify individually radio labeled or equipped with GPS. Normally marks or scars are only available for the individual recognition of the exemplars, which extremely obstructs the monitoring task.

In the case of fish, traditional tagging systems do not permit remote identification, which makes necessary the recapture to ensure the identification.

Our dorsal tags are made of flexible plastic sheets and are equipped with high durability for the hard marine conditions. A big range of sizes allows the use in any species, from the different species of whales and minke, to killer whales and other species. The possibility of any color, shape or size also allows its use in different species of fish and sharks and its easy read allows the collaboration of divers, pleasure boats and other partners in the monitoring of the species. Our customers can adapt the design of their tags to the fastening system chosen (harpoons, cupping, etc..).

Cetaceans

A big range of sizes allows the use in any species, from the different species of whales and minke, to killer whales and other species. The possibility of any color, shape or size also allows the remote identification, both from boats and from the shore. Its easy read makes allows the collaboration of fishing boats and recreational monitoring species.

Fishes

Marks indicated for the tagging of fish, both for marine and inland waters, allowing the identification of species without the recapturing and handling of them. Its easy read allows the inestimable assistance of recreational divers and underwater photography amateurs.

If you have any questions please contact us , as Màquia does not only offers you advice, but it also puts you in touch with those customers with whom you can share experiences and ask your doubts.
